

## 6. Photo Phone

**Categories:** Hearing and Cognitive

**Manufacturer:** Clarity

If you have memory loss and low-to-moderate hearing loss, the Photo Phone is for you. You can dial a number by pressing a picture of a familiar person. Just insert your photos into the memory panel for speed dialing, and you can quickly and easily dial by photo. If you prefer, you can write the names and/or telephone numbers into the directory's nine spaces. The phone also comes with generic, ready-to-use icons. The Photo Phone features technology to make sounds not only louder, but also clearer and easier to understand. With up to 26 decibels of amplification and programmable photo memory buttons, the Photo Phone is an ideal solution for those with mild-to-moderate hearing loss, low vision, or cognitive challenges.
